Makham Ishitha Gupta

7780401762 | makhamishitagupta@gmail.com GitHub | LinkedIn | Portfolio

TECHNICAL SKILLS

Programming Languages : Python, C++, C, Java
Web Development : HTML, CSS, JavaScript, React.js, Node.js, Express, MongoDB, SQL
Libraries & Frameworks : NumPy, Pandas, Seaborn, Matplotlib, Scikit-learn
Soft Skills : Teamwork, Problem solving, Time Management, Communication, Adaptability, Self-learner, Excellent work ethic

INTERNSHIP

Frontend Developer & Marketing Intern | BandiWala Food Tech Pvt Ltd | Mar 2025 – Dec 2025

- **Responsive Food Ordering Platform:** Developed a responsive food ordering web interface using React.js and Tailwind CSS, enabling smooth browsing of vendors, menus, food items and more across devices.
- **Reusable UI Components & Features**: Built scalable UI components for vendor listings, menu pages, product detail views, and implementing features like search functionality, ratings display, and dynamic pricing with quantity selection.
- **Frontend Performance, UX & Marketing Support:** Optimized responsive layouts, navigation flow, and frontend performance to improve user experience, while supporting digital marketing campaigns and promotional initiatives to increase platform visibility and user engagement.

PROJECTS

Academic Resource Management Platform | React, Node.js, Express, MongoDB, Cloudinary, JWT | Full-Stack Web App | GitHub Link | Live Demo

- Built a centralized academic resource-sharing platform enabling students and instructors to manage, browse, and download exam papers and study notes with role-based access control.
- Implemented secure authentication and authorization with encrypted passwords, protected routes, and admin-only dashboards for resource, subject, and user management
- Developed scalable RESTful APIs with Express.js and MongoDB, integrated Cloudinary for cloud-based PDF storage, and implemented analytics features including download tracking, user engagement insights, favorites, and discussion threads.

Loan Approval Prediction System | React, Node.js, Scikit-learn | Full-Stack ML Application | GitHub Link | Live Demo

- Built an end-to-end loan approval prediction system integrating a React frontend, Node.js backend, and FastAPI-based ML microservice, enabling real-time predictions through seamless full-stack communication.
- Trained and evaluated multiple classification models (Logistic Regression, KNN, Naive Bayes), performed data preprocessing (missing value handling, one-hot encoding, feature scaling), and applied feature engineering, selecting Logistic Regression based on optimal F1-score and balanced performance.

Titanic Survival Prediction – Kaggle ML Competition | Python, Pandas, Matplotlib, Scikit-learn | GitHub Link

- Built and evaluated classification models (Logistic Regression, Random Forest) achieving **75.6% accuracy** on Kaggle Titanic dataset using feature engineering and cross-validation.
- Performed data cleaning, handled missing values, and applied feature engineering (e.g., extracting titles from names).
- Used model evaluation techniques to assess accuracy and submitted predictions to Kaggle (Score: **0.75598**).

EDUCATION

VNR Vignana Jyothi Institute of Engineering and Technology ***Hyderabad, Telangana***
B.Tech in CSE - Data Science (2028 Expected) **|** CGPA: 9.43 (till 2nd year, I Sem)

Sri Chaitanya Junior College ***Hyderabad, Telangana***
Intermediate (2024) – 96%

CMR Model High School ***Hyderabad, Telangana***
10th Class (2022) – 9.8 CGPA

ACHIEVEMENTS

- 1st Runner-up, National Level VJ Hackathon - Smart Innovations, VNR VJIET (Oct 2025).
- 3rd Prize in Spark Quiz Competition at Convergence 2024
- Secured 96.51 percentile in JEE Main 2024, ranking among the top 4% of candidates nationwide.

- Qualified JEE Advanced 2024, demonstrating strong problem-solving and analytical skills.
- Secured State Rank 3877 in EAPCET 2024, ranking in the top 2% among candidates in Telangana.

VOLUNTEER EXPERIENCE

VJ Data Questers - Technical Volunteer and Website Developer | February 2026 - Present

- Contribute to VJ Data Questers mission of promoting data science by developing and maintaining the official website vjdataquesters.com and supporting the organization of workshops, lectures, and events.

VJ Startups - Webmaster | March 2026 – Present

- Lead development, deployment, and maintenance of VJ Startups' websites and technical infrastructure.
- Developed BlogFuel, a full-stack MERN blogging platform with CRUD blog management and Markdown support and implemented authentication using JWT, Google OAuth, and bcrypt with role-based admin access control.
- Currently developing the official VJ Startups website, contributing to full-stack architecture, frontend development, backend API integration and deployment.

CERTIFICATIONS

- Certificate for Completion of Python Program offered by the CISCO
